**Part 7 Point Graphs**  
Nila checked the baby-shoe size of her little cousins and also wrote down their ages. She collected the data in this table.

Name	Age in Months	Shoe Size	Ordered Pairs (Mos., Size)
Hayden	12	4	
Charlie	34	7	
Anita	20	5	
Hope	26	7	
Willis	32	8	

- Write Nila's data as ordered pairs in the table.
- Graph the data in a point graph using the graph below.

**Part 8 Shopping with Grandmother**

Solve the following problems. Show how you solved each one using drawings or words.

- Ming and his grandmother went shopping at the mall. The mall has two floors. The first floor has 62 stores. The second floor has 48 stores. How many stores are in the mall?
- The mall newspaper claims that nearly half the stores are participating in a fall sale. About how many stores are participating in the fall sale?
- The bus fare to the mall was 85¢ for his grandmother and 75¢ for Ming. What was the total bus fare to and from the mall? (Remember, they need to come home too!)

**Part 8. (TG pp.6–7)**

**Questions 1–6**

- 110 stores.  $62 + 48 = 110$
- About 55 stores.  $110 \div 2 = 55$
- \$3.20;  $85 + 85 + 75 + 75 = 320$
- Linda did not show all the steps or use labels.

$$\begin{array}{r} 85 \\ + 85 \\ \hline 170 \end{array} \quad \begin{array}{r} 75 \\ + 75 \\ \hline 150 \end{array} \quad \begin{array}{r} 170 \\ + 150 \\ \hline 320 \end{array}$$

\$3.20

- 64;  $54 + 9 + 1 = 64$
- 91 points;  $74 + 17 = 91$

- Linda showed this work for Question 3. What would you add to Linda's solution to make it more clear?

3.

$$\begin{array}{r} 170 \\ 150 \\ \hline 320 \end{array}$$

Math Practices Expectations:

- Show my work.** I show or tell how I arrived at my answer so someone else can understand my thinking.
- Use labels.** I use labels to show what numbers mean.

Rewrite Linda's work with your suggested changes.

- On the way home, they stopped in the grocery store. Ming went to the deli counter to buy lunch meat. He took a number from the counter which gave his turn in line. The girl behind the counter was waiting on Number 54. After Number 54, nine more people needed to be served before it was Ming's turn. What number did Ming have?
- When Ming got home, he and his grandmother played a basketball game on the computer. His grandmother won the game! Her team scored 17 more points than Ming's team. If Ming's team scored 74 points, how many points did his grandmother's team score?
