

**Find the number of small squares in each rectangle below using the break-apart method.**

- Break the rectangle into two parts that make the multiplication easier.
- Write number sentences on each part that show the number of squares in each.
- Write a number sentence to show how to find the total number of squares in the large rectangle.

**2.**  $8 \times 21$

**3.**  $6 \times 26$

**4.**  $7 \times 32$
