Name _____   Date _____

A Triangle Flash Cards: Last Six Facts

With a partner, use your Triangle Flash Cards to quiz each other on the multiplication facts for the last six facts. One partner covers the shaded corner containing the highest number. The second person multiplies the two uncovered numbers. These two are the factors.

Separate the used cards into three piles: Facts I Know Quickly, Facts I Can Figure Out, and Facts I Need to Learn. Practice the last two piles again, and then make a list of the facts you need to practice at home for homework.

Circle the facts you know quickly on your *Multiplication Facts I Know* chart.

B Story Solving

Write a story for 6×8. Draw a picture for your story and label it with a number sentence.
