

**8. A.** Arlene's grandmother lives 250 miles away. Arlene tries to visit her grandmother at least twice every year. In six years, how many miles does Arlene drive visiting her grandmother? (Remember, she has to drive back home after each visit.)

**B.** John, Irma, and Steve combined their dominos and set up a domino trail that was 1500 dominos long. They challenged all the classes in their school to match their trail. At the end of the challenge, there were a total of 40 groups of students who built domino trails using 1500 dominos each. How many dominos were used in all?
