## **Our Best Estimate**

## Work in groups of three to estimate answers for each of the problems below. For each problem:

- Estimate an answer on your own (use mental math if you can). Write your own estimate in the first box.
- Share your estimate with your partners and explain your reasoning. Write your partners' estimates in the boxes under their names.
- Discuss with your partners which estimate is the best and why you think so. Write your group's best estimate in the "Our Best" column.
- In the "Our Reasoning" column, show or tell why your group decided it was the best estimate.

## The first problem is an example.

		ESTIN	MATES		
Problem	Mine	Partner Name:	Partner Name:	Our Best	Our Reasoning
Example 38 × 6	210	240	200	240	This estimate is best because we had to use only one convenient number (40) which is close to 38. $40 \times 6 = 240$
<b>1.</b> 8 × 27					

Date \_

0		ESTIMATES				
	Problem	Mine	Partner Name:	Partner Name:	Our Best	Our Reasoning
	<b>2.</b> 98 × 9					
	<b>3.</b> 77 × 52					
	<b>4.</b> 89 × 27					
	<b>5.</b> 752 × 6					
	<b>6.</b> 72 × 965
