

## The Rain in Borneo

The average rainfall in Borneo is 160 inches per year. The highest recorded annual rainfall was 225 inches and the lowest was 102 inches. (The wettest state in the mainland U.S. has an average rainfall of 56 inches.)

1. Make up a possible 10-year record of the annual rainfall in Borneo so that the mean rainfall is 160 inches. Keep your values reasonable (102–225 inches). Explain how you worked on the problem and arrived at your answer. Use a separate sheet of paper.
2. With such a high rainfall, where on Earth would you expect to find Borneo? Find Borneo on a map of the world.

## Math Facts Practice

$n$  stands for a missing number. Find the number that will make the sentence true. Then write the other number sentences in the same fact family.

- A.  $15 \div n = 3$  \_\_\_\_\_
- B.  $27 \div n = 3$  \_\_\_\_\_
- C.  $16 \div n = 2$  \_\_\_\_\_
- D.  $18 \div n = 2$  \_\_\_\_\_
- E.  $21 \div n = 3$  \_\_\_\_\_
- F.  $24 \div n = 3$  \_\_\_\_\_
- G.  $2 \div n = 2$  \_\_\_\_\_
