

I Multiplication

Solve the problems two ways. Use a paper-and-pencil method and a mental math strategy for each. Explain your mental math strategy for one problem.

A. 79×3

B. 52×6

J Adding and Subtracting for Practice

Do the following problems mentally. Be ready to explain how you solved each problem without paper and pencil.

A. $89,300 - 102 =$

B. $77,900 + 1100 =$

C. $65,800 - 5099 =$

Use paper and pencil to solve Problems D–F. Estimate to make sure your answers make sense. Show your estimation strategy for Problem F.

D.
$$\begin{array}{r} 13,457 \\ - 4,294 \\ \hline \end{array}$$

E.
$$\begin{array}{r} 85,609 \\ - 6,725 \\ \hline \end{array}$$

F.
$$\begin{array}{r} 67,890 \\ + 32,484 \\ \hline \end{array}$$
