

Q Flash Estimation

- A. Your teacher will flash a problem on a display. It will be either multiplication or addition. Estimate the solution to the problem using convenient numbers. You will not have time to solve the problem using pencil and paper.

- B. What strategies did you use to estimate? Which numbers in the problems did you focus on most to make your estimate?

R Oceans

- 1. The Pacific Ocean covers about 64,186,300 square miles. The Atlantic Ocean covers about 33,420,000 square miles. About how many more square miles does the Pacific Ocean cover than the Atlantic?

- 2. The Indian Ocean covers about 28,350,000 square miles. Do the Atlantic and Indian Oceans combined cover more or less area than the Pacific Ocean?
