

# Michael's Work

We decided we picked 5,000 steps because all three of us in our group walk about 100 steps per minute.  $100 \times 60 = 6,000$  and 5,000 is the closest to 6,000 steps.

100 steps we took because we took 100 steps and there are 60 minutes in an hour.

we used the calculator for a minute

Name	Number of steps in a minute
Michael	112
Roberto	97
Jessie	108
