

**Student Activity Book**

**Practicing Multiplication Strategies**

**Questions 1–16 (SAB pp. 239–246)**

1. A. 30; 2000; 36  
 B.  $539 = 500 + 30 + 9$   
 C. 4 and 500;  $4 \times 500 = 2000$
2. A. 80; 1200; 80; 7; 21  
 B.  $487 = 400 + 80 + 7$   
 C. 3 and 80;  $3 \times 80 = 240$
3. A. 600; 32,000; 600; 280; 32,000; 280  
 B.  $8679 = 8000 + 600 + 70 + 9$   
 C. It represents 2 thousands that were carried over by multiplying  $4 \times 600 = 2400$  and adding the carried over 300.  
 D. In the box where 4 and 600 are multiplied to get 2400.
4. A.  $7 \times 70 = 490$ ;  $7 \times 6 = 42$ ; 490; 42  
 B.  $2000 + 800 + 30 + 6$ ; 4000; 30  
 C. 450, 18

**Practicing Multiplication Strategies**

**Connecting Methods**

✓ **Self-Check: Question 1**

Use the *Multiplication Strategies Menu for Larger Numbers* in the *Student Guide Reference* section to help you solve each problem.

1. Irma solved  $4 \times 539$  using rectangles.

|                       |                     |                   |   |
|-----------------------|---------------------|-------------------|---|
| 500                   | 30                  | 9                 |   |
| $4 \times 500 = 2000$ | $4 \times 30 = 120$ | $4 \times 9 = 36$ | $\begin{array}{r} 2000 \\ 120 \\ + 36 \\ \hline 2156 \end{array}$ |

A. Use her rectangles to fill in the blanks for the same problem using expanded form.

$539 = 500 + \square + 9$

$\begin{array}{r} 539 \\ \times 4 \\ \hline \end{array} = 2156$

B. Write a number sentence to show how Irma broke apart 539.

Number sentence: \_\_\_\_\_

C. What numbers did Irma multiply in both problems to get 2000?

Use the *Self-Check Questions* and the menu to check your progress and choose practice with using multiplication methods.

| Can I Do This?   | Working On It!                   | Getting It!                         | Got It!                        |
|--|----------------------------------|-------------------------------------|--------------------------------|
| <br>Show that I understand multiplication methods. Make connections between methods. | <br>I could use some extra help. | <br>I just need some more practice. | <br>I'm ready for a challenge. |
| ★Q# 2, 4–6, 9, 12  | ●Q# 2, 4, 6–10, 12               | ■Q# 3, 4, 7–12                      |                                |

★●2. John solved  $487 \times 3$  using the all-partials method.

|                          |                          |                         |
|--------------------------|--------------------------|-------------------------|
| 400                      | 7                        |                         |
| $3 \times 400 = \square$ | $3 \times \square = 240$ | $3 \times \square = 21$ |

$$\begin{array}{r} 487 \\ \times 3 \\ \hline 21 \\ 240 \\ 1200 \\ \hline 1461 \end{array}$$

A. Complete the same problem using the rectangle method. Fill in the boxes with the correct numbers.

B. Write a number sentence to show how John broke apart 487.

Number sentence: \_\_\_\_\_

C. What numbers did he multiply in both problems to get 240?

■3. Ana solved  $8679 \times 4$  using the compact method.

|                           |                           |                         |  |
|---------------------------|---------------------------|-------------------------|--|
| 8000                      | 70                        | 9                       |  |
| $4 \times 8000 = \square$ | $4 \times \square = 2400$ | $4 \times 70 = \square$ | $\begin{array}{r} 8679 \\ \times 4 \\ \hline 34,716 \end{array}$ |

A. Fill in the rectangles for the same problem.

B. Write a number sentence to show how Ana broke apart 8679.

Number sentence: \_\_\_\_\_

C. What does the little 2 above the 8 in the compact method represent?

D. Where is the same 2 in the rectangle method?

5. 350
6. 400; 5; 240
7. 4200; 630; 4858
8. 140; 18,000
9.  $300 \times 3 = 900$ .  
 $298 \times 3$  will be  $2 \times 3$  or 6 less.  
 $900 - 6 = 894$ .  $298 \times 3 = 894$
10. Cut 486 in half to get 243. Double 5 to get 10.  
 $10 \times 243 = 2430$ .  $5 \times 486 = 2430$ .
11. 252 is like \$2.52.  $3 \times \$2.50$  is \$7.50.  
 $3 \times 2\text{¢} = 6\text{¢}$ . Add in 6¢ to get \$7.56.  
 So  $252 \times 3 = 756$ .
12. Paper-and-pencil and mental math strategies will vary.
  - A. 3736; Possible paper-and-pencil strategy:
 
$$\begin{array}{r} 467 \\ \times 8 \\ \hline 3200 + 480 + 56 = 3736 \end{array}$$
  - B. 1196; Possible mental math strategy:
  $4 \times 300 = 1200$ . 299 is one less than 300.  
 $4 \times 1 = 4$ .  $1200 - 4 = 1196$ .  
 $4 \times 299 = 1196$
  - C. 1020; Possible mental math strategy:
 204 is like \$2.04.  $5 \times \$2.00 = \$10.00$ .  
 $5 \times 4\text{¢} = 20\text{¢}$ . Add 20¢ to get \$10.20, so  
 $204 \times 5 = 1020$ .

13. Strategies and methods will vary. Some possible responses:

|   |      |    |    |
|---|------|----|----|
|   | 300  | 20 | 4  |
| 4 | 1200 | 80 | 16 |
| 4 | 1200 | 80 | 16 |

$$2400 + 160 + 32 = 2592$$

$$\begin{array}{r} 324 \\ \times 8 \\ \hline 2400 \\ 160 \\ + 32 \\ \hline 2592 \end{array}$$

$$\begin{array}{r} 300 + 20 + 4 \\ \times 8 \\ \hline 2400 + 160 + 32 = 2592 \end{array}$$

Methods and strategies will vary. One possible method is given for each problem. Look for evidence that students are choosing strategies that “fit” the problem.

**14. A.**  $240$ ;  $10 \times 48 = 480$   
 $480 \div 2 = 240$

**B.**  $2036$ ;  $500 \times 4 = 2000$ ;  
 $9 \times 4 = 36$ ;  
 $2000 + 36 = 2036$

**C.**  $7578$ ;  $842$   
 $\begin{array}{r} \times 9 \\ \hline 18 \\ 360 \\ \hline 7200 \\ 7578 \end{array}$

**D.**  $3858$ ;  
 $600 + 40 + 3$   
 $\begin{array}{r} \times 6 \\ \hline 3600 + 240 + 18 = 3858 \end{array}$

**E.**  $2772$ ;  $924$   
 $\begin{array}{r} \times 3 \\ \hline 2772 \end{array}$

**F.**  $2784$ ;  $300 \times 8 = 2400$   
 $50 \times 8 = 400$   
 $2 \times 8 = 16$   
 $\begin{array}{r} 2800 \\ - 16 \\ \hline 2784 \end{array}$

**G.**  $1340$ ;  $268 \times 10 = 2680$   
 $2680 \div 2 = 1340$

**H.**  $49,448$ ;  $7064$   
 $\begin{array}{r} \times 7 \\ \hline 28 \\ 420 \\ \hline 49,000 \\ 49,448 \end{array}$

**15.** Answers will vary. A possible solution for Question 14A:

$5 \times 50 = 250$ ;  
 $5 \times 2 = 10$ ;  
 $250 - 10 = 240$

**16.** Answers will vary. A possible solution for Question 14H:

$7 \times 7000 = 49,000$

The answer should be a few hundred more than 49,000.
