

# Fraction Order

**The object of the game is to fill the game board by placing six fractions in order from smallest to largest. This game is for one to four players.**

## Materials

- *Fraction Order Game Board* for each player
- One set of *Fraction Cards 1* and *2* for two players. Mix the cards and place them face down between the players. Mix together two sets for 3 or 4 players.
- Fraction Chart or fraction circle pieces

## Directions

1. Players take turns. On your turn, draw a card from the pile and decide where to place it on your game board.
2. If you draw a card that you cannot place because of the numbers already on your game board, keep the card and lose a turn.
3. If you draw a card with a fraction equivalent to one already placed on your game board, place the card to the right or left of the equivalent fraction, if a space is open.
4. When one player fills his or her game board, all players use a Fraction Chart or fraction circle pieces to check that the order is correct.
5. The winner is the player who correctly fills his or her game board first.

## Variations

- Partners play with one game board and take turns placing fraction cards on the game board. The winner is the player who fills the last space on the game board.
- Order the fractions from largest to smallest.
- Include fraction cards that are not easily represented with circle pieces or the Fraction Chart:

$$\frac{3}{7}, \frac{3}{20}, \frac{99}{100}, \frac{1}{99}, \frac{48}{50}, \frac{21}{22}$$
