A The Last Six Facts

With a partner, use your Triangle Flash Cards: Last Six Facts to quiz each other on the related division facts for the last six multiplication facts (24 ÷ 6, 24 ÷ 4, 28 ÷ 7, 28 ÷ 4, 32 ÷ 8, 32 ÷ 4, 42 ÷ 7, 42 ÷ 6, 48 ÷ 8, 48 ÷ 6, 56 ÷ 8, 56 ÷ 7). Ask your partner first to cover the numbers in the squares. Use the two uncovered numbers to solve a division fact. Then, ask your partner to cover the numbers in the circles. Use the uncovered numbers to solve a division fact.

After each time through the cards, separate them into three piles: Facts I Know Quickly, Facts I Can Figure Out, and Facts I Need to Learn. Practice the last two piles again, and make a list of the facts you need to practice at home for homework.

Circle the facts you know and can answer quickly on your *Division Facts I Know* chart.

Your teacher will tell you when you will take the quiz on these facts.
