

# Dividing Into Columns

Solve the following division problems using the column method.

Example:  $439 \div 6 = \underline{73 \text{ R}1}$

	Into the Columns	Left to Divide
3	18	$19 - 18 = 1$
20	120	$139 - 120 = 19$
50	300	$439 - 300 = 139$
