

Homework

1. Look at the two scales on this page. How are they alike?
How are they different?
2. How many cubic centimeters (cc) does each space represent on the scale for a 100-cc graduated cylinder?
3. How many cubic centimeters does each space represent on the scale for the 250-cc graduated cylinder?
4. Write the scale reading for each letter.

Scale for a 100-cc cylinder.

Scale for a 250-cc cylinder.
