Graph Stories

1.

Balloon Ride

**A.** Using the data, tell a story about the height of the balloon during a balloon ride.

B. Do the points form a line? If yes, draw a best-fit line on the graph. If no, describe the shape of the graph.

C. Using this data, can you make a reasonable prediction about the height of the balloon at 12:15? Why or why not?

D. If possible, predict the height of the balloon at 1:45.
