

Estimating Volume Again

1. Estimate the volume of the jar your teacher shows you. Write down your estimate and be ready to share your estimation strategy with the class.
2. After everyone has made his or her estimate, a student from the class will find the volume of the jar using a graduated cylinder.

Area and Perimeter

A rectangle is 4 cm wide. Its length is twice as long as its width.

1. Draw the rectangle described above. You may use a sheet of *Centimeter Grid Paper*.
2. Find the area of the rectangle. _____
3. Find the perimeter. _____
4. Draw a rectangle that has the same area, but has a perimeter of 36 cm.
