

**A** Using Mental Math to Add and Subtract

Do these problems in your head.

A.  $34 + N = 39$                        $N = \underline{\hspace{2cm}}$

B.  $50 + 45 = N$                        $N = \underline{\hspace{2cm}}$

C.  $89 + N = 92$                        $N = \underline{\hspace{2cm}}$

D.  $104 - N = 99$                        $N = \underline{\hspace{2cm}}$

E.  $N + 128 = 148$                        $N = \underline{\hspace{2cm}}$

F.  $210 + N = 266$                        $N = \underline{\hspace{2cm}}$

G.  $N - 105 = 100$                        $N = \underline{\hspace{2cm}}$

H.  $N - 40 = 43$                        $N = \underline{\hspace{2cm}}$

I.  $919 - N = 119$                        $N = \underline{\hspace{2cm}}$

J. Show or tell how you solved Question D. What did you do in your head?
