

**B Problem Solving at the Amusement Park**

Admission to the amusement park is \$1.50. Every ride costs 50 cents.

1. Romesh and his two sisters all went to the amusement park. They each rode two rides. They each bought a bag of popcorn for 25 cents. How much money did they spend altogether? Show or tell how you found your answer.
  
2. Ana and Mary together spent \$12.00. How many rides did they go on? Explain how you know.
  
3. John started his day at the amusement park with \$10.00. He went on four rides. He also spent 15 minutes at the batting cage that cost \$1.00 for five minutes. Then he went home.
  - A. How much money did he have left? Show or tell how you solved the problem.
  
  - B. John wants to go back to the amusement park tomorrow. He said he can go on 7 rides. Do you agree with John? Why or why not?
