## Purchasing Shoes

Edward is purchasing a pair of shoes for \$23.95 and two new pairs of socks at \$1.25 each.

1. How can Edward decide if \$30.00 is enough money for the shoes and socks without using paper and pencil?
2. How much is Edward's purchase without tax?
3. With tax, Edward owes the sales clerk \$28.30. How much was the tax?
4. If Edward gives the clerk \$30.00, how much change should he receive?
