

# Find Fraction Differences

- Use fraction circle pieces to show both fractions in the subtraction problems below.
- Estimate the answer. Show your estimate on the number line in the second column.
- Use the single-color method to do the subtraction problem with circle pieces.
- Make a sketch to show how you subtracted as shown in the example.
- Write two number sentences for each problem.

Problem	Estimate and Fraction Difference	Number Sentences
<b>Example</b>  $\frac{3}{5} - \frac{1}{10}$		$\frac{3}{5} - \frac{1}{10} = \frac{1}{2}$ $\frac{6}{10} - \frac{1}{10} = \frac{5}{10}$
<b>1.</b>  $\frac{1}{2} - \frac{1}{8}$		
<b>2.</b>  $\frac{2}{3} - \frac{1}{6}$		

Problem	Estimate and Fraction Difference	Number Sentences
<p>3.</p> $1 - \frac{3}{4}$		
<p>4.</p> $\frac{2}{3} - \frac{1}{4}$		
<p>5.</p> $\frac{7}{10} - \frac{2}{5}$		
<p>6.</p> $\frac{5}{6} - \frac{3}{4}$
