JJ Making Change

You want to make change for \$50.00 using only \$5.00 bills and \$10.00 bills.

1. How many \$5.00 bills and \$10.00 bills might there be? (Give several answers to this problem.)

2. What is the fewest number of \$5.00 bills you can use? How many \$10.00 bills would there be?

3. What is the fewest number of \$10.00 bills you can use? How many \$5.00 bills would there be?

4. If you use exactly 7 bills to make change, how many will be \$5.00 bills and how many will be \$10.00 bills?
