V Nickels and Dimes

There are some nickels and dimes on the counter. The total is 65 cents.

1. How many nickels and how many dimes might there be? (Give several answers to this problem.)

2. What is the fewest number of dimes that might be on the counter? Then how many nickels would there be?

3. What is the fewest number of nickels that might be on the counter? Then how many dimes would there be?

4. There are 9 coins on the counter. How many nickels and how many dimes are on the counter?
