

# Working with Big Numbers

## Homework

- Find  $n$  to make the number sentence true.
  - $300,000,000 + n + 6,000,000 + 700,000 = 316,700,000$
  - $7,700,000 = n + 700,000$
  - $n + 90,000,000 + 5,000,000 + 200,000 = 7,095,200,000$
- The fifth-graders are studying population in their Social Studies class. They are comparing the population of different age groups in countries around the world and have come up with some of the figures for this table. Complete the rest of the table.

**2013 International Populations Rounded  
to the Nearest Hundred Thousand**

Country	Total Population	Age Group 0–14	Age Group 15–64	Age Group 65+
Chile		3,600,000	11,900,000	1,700,000
India	1,220,800,000		798,900,000	69,500,000
Israel	7,700,000	2,100,000		800,000
Russia	142,500,000	22,900,000	101,000,000	
Uganda	34,800,000		17,000,000	700,000
United States	316,700,000	63,400,000	209,400,000	
World	7,095,200,000	1,367,000,000	5,149,400,000	578,800,000

Name \_\_\_\_\_ Date \_\_\_\_\_

**3.** Write an equation or draw a number line to show how you found the answers for the following:

**A.** What is the total population of Chile?

**B.** How many children are in Uganda?

**C.** How many senior citizens are in the United States?

**4.** Place the total population of each country on the World Population Number Line 2.

Name \_\_\_\_\_ Date \_\_\_\_\_

## World Population Number Line 2
