

## **F** Fractions

**N**

1. The two squares shown here together represent  $\frac{1}{4}$ .

- A. Draw one whole.
- B. Write a fraction to represent one of the two squares shown above.

2. If the shape below represents  $\frac{1}{6}$ , show  $\frac{1}{2}$ .

## **G** Multiplication by Multiples of Ten

Find the missing number,  $n$ , in each sentence to make that sentence true.

- |                            |                           |
|----------------------------|---------------------------|
| A. $100 \times n = 9000$   | B. $50 \times n = 45,000$ |
| C. $900 \times n = 27,000$ | D. $n \times 400 = 3600$  |
| E. $900 \times 80 = n$     | F. $n \times 70 = 6300$   |
