Confused Contessa Finds Volume

Contessa is finding the volume of this cube.

5 cm

5 cm

5 cm

Here is her thinking:

The width is 5 cm.
The height is 5 cm.
The length is 5 cm.
So the volume is 5 cm $\times$ 3 = 15 cm^3.
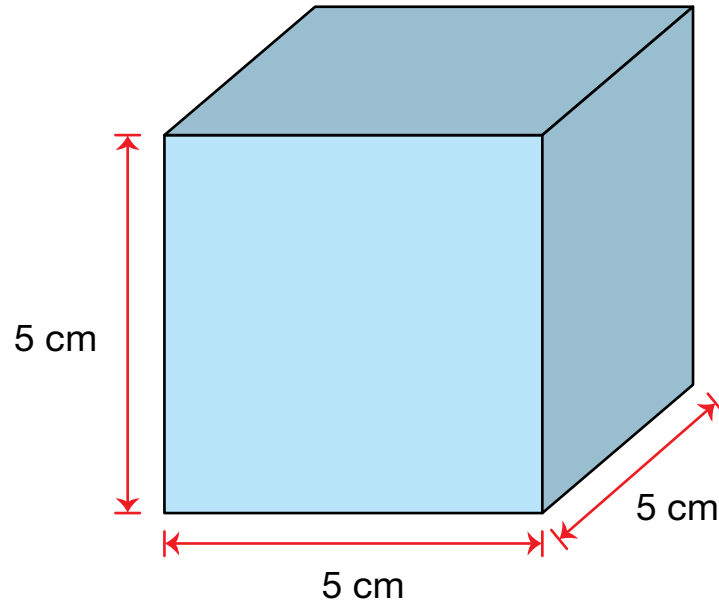

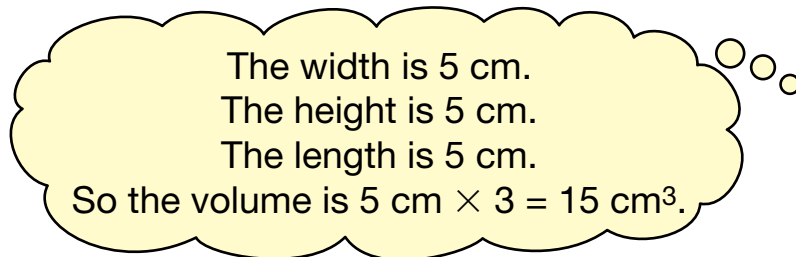

Discuss Contess's solution with a partner. Do you agree with Contessa? Why or why not?
