**K** **Break-Apart Products**

Draw rectangles to show a way to break apart the products into two easier products. Write number sentences to match. Use a separate sheet of paper if needed.

Example: 4 × 6

	5	1

| 4 | 4 × 5 = 20 | 4 × 1 = 4 |

$4 \times 6 = (4 \times 5) + (4 \times 1)$
$4 \times 6 = 20 + 4 = 24$

A. 7 × 6

B. 8 × 6

C. 4 × 7

D. 8 × 7

L **Measuring Area**

A rectangular window is 5 feet high by $4\frac{1}{2}$ feet wide. Irma says the area is $20\frac{1}{2}$ square feet. Is she correct? If not, what is the area of the window? Draw a picture on the grid.
