

# Subtract Decimals with Grids and Number Lines

**1.** Lee Yah is building shelves. She has a board that is 0.85 m long. She cuts 0.2 m from the board.

**A.** Use the number line to estimate  $0.85 - 0.2$ .

**B.** Use a pencil to lightly shaded 0.85 of the grid.

**C.** Erase 0.2 of the shaded part.

**D.** How long is the board after she cuts it?

**2.** Jason used a hundredths grid to solve  $0.85 - 0.2$ .

He shaded 0.85.

Then he erased some.

Do you agree with Jason? Why or why not?
