

# Multiples Cover-Up Spinner and Game Board

Use the blank spinner and game board to create a Multiples Cover-Up game to play at home. Divide the spinner into 3, 4 or 6 spaces. Choose two numbers if your spinner has three outcomes. If your spinner has four outcomes, choose three numbers for the game and if your spinner has six outcomes you can find the multiples of 3 or more numbers. Each player will need to make a  $4 \times 4$  game board. Directions are in the *Student Guide*.
