

II Compare Numbers**N**Use $<$, $>$, or $=$ to make each number sentence true.

1. $0.4 \bigcirc 0.397$

2. $0.007 \bigcirc 0.01$

3. $0.25 \bigcirc \frac{1}{4}$

4. $0.05 \bigcirc 0.50$

5. $\frac{2}{5} \bigcirc 0.4$

6. $0.75 \bigcirc \frac{3}{6}$

7. Show or tell how you solved Question 5.

JJ Giant Problems**N**

- Lee Yah is telling a story to her little sister. The story is about a giant and a fifth grader. In the story, the body of the giant and the body of the fifth grader are proportional. The fifth grader is 140 cm tall and her hand is 12 cm long. If the giant's hand is 36 cm long, how tall is the giant?
- A. The giant has 3 sisters. The first sister is $\frac{5}{6}$ as tall as the giant. The second sister is $\frac{5}{7}$ as tall as the giant. The third sister is $\frac{6}{7}$ as tall as the giant. Which sister is the tallest? How do you know?

B. Calculate the heights of the three sisters. Show your work.
