

What is in Our Landfills

1. Shannon researched the kinds of trash that is thrown into our landfills. She organized her data in a table. Write each fraction as a decimal in the third column.

Type of Trash	Fraction	Decimal
Paper	$\frac{9}{25}$	
Compostable Food and Yard Waste	$\frac{3}{10}$	
Glass and Plastic	$\frac{7}{50}$	
Metal and Other Waste	$\frac{1}{5}$	

2. Shannon made a circle graph showing her information but forgot to label each part of her graph. Use the information in the data table to label each part of her circle graph.
